AN ATTEMPT TO  
EXPLAIN WHY THEY  
COME TO VISIT US

By Jean Pierre Petit. France

1976

well, young man, as they told me, you would like to do a Phd Thesis, A sort of Sociologic Study

Yes Sir, on the Planet Kafkit

Aoh, this planet is pretty far away from us. That would cost a lot of money, you know...

Our financial support is pretty low now - I suggest you to go to a closer planet, called the earth. It is over there

Badly. They send me to the earth. As I have been told, they have a very poor culture, and they are almost savage

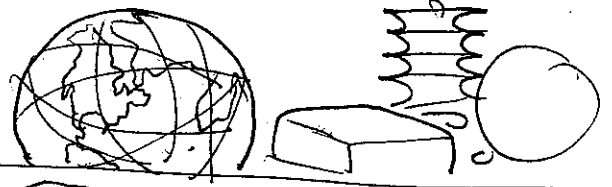

Hi, UMMO, how is it going on, today?

Wanna make a OULALA game?

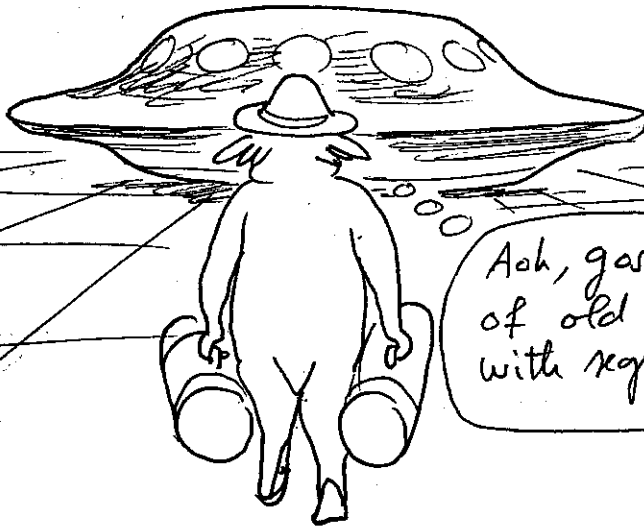

I'm gonna make a poor Phd Thesis. There is nothing to do with such a planet

Yes, m<sup>r</sup> ummo, your mhd flying saucer is planned for today. Ou la era numba 6079X\*E ZNA

Foreigners only

Flights to planets  
A to K

Aah, gash, that kind of old fashioned machine, with segmented electrodes!

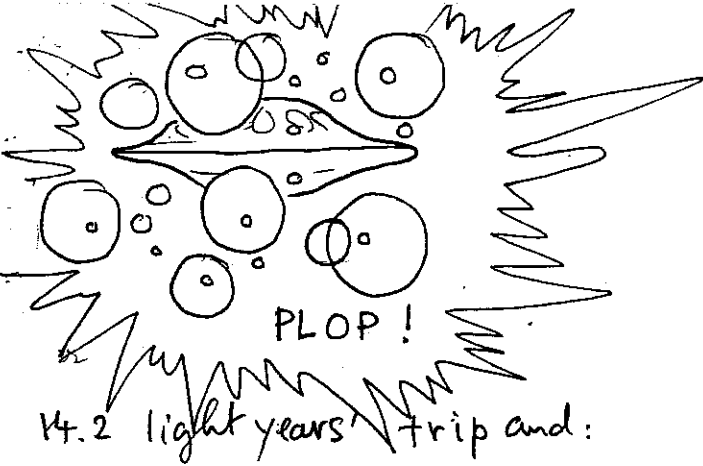

well, here we are. See, after mhd flight, get the channel RT and invert the IBOZO-u

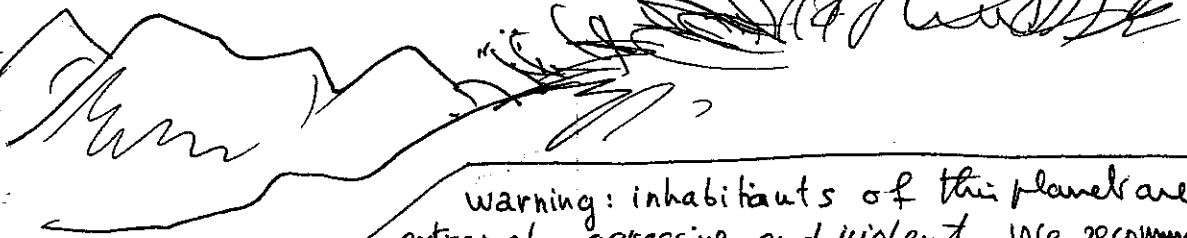

WARNING: ONLY SHORT DURATION FLIGHT IN THE TACHYONS' SPACE

The earth!

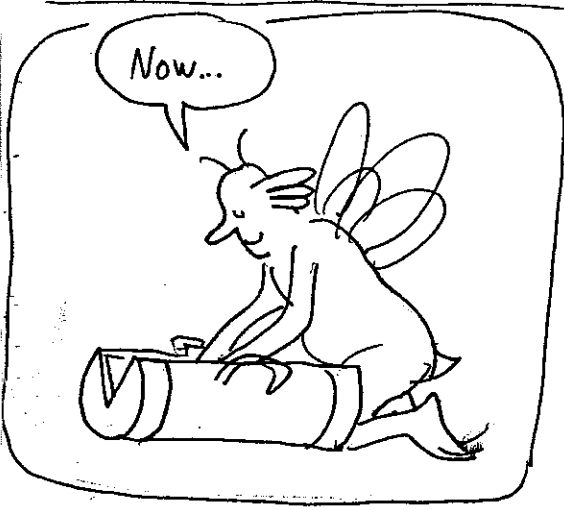

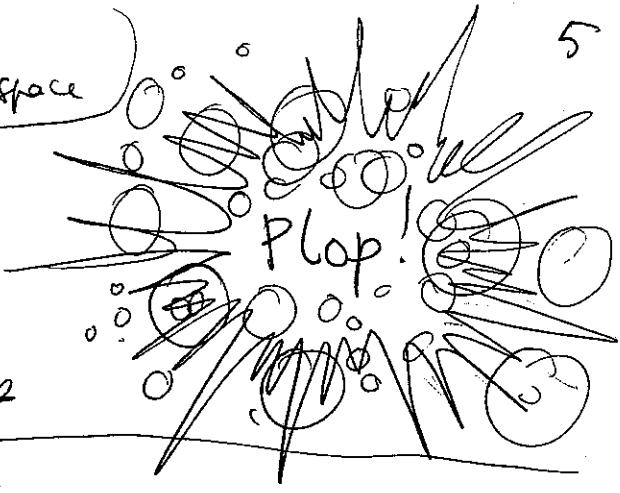

14.2 light years trip and:

warning: inhabitants of this planet are extremely aggressive and violent. We recommend to avoid any contact. They are also very primitive.

(First, let us park the saucer in the elsewhere space)

Now...

it looks ok!  
let us go

my tailor is rich...  
my tailor is rich...  
my tailor is rich....

What an exciting  
impression of  
danger!

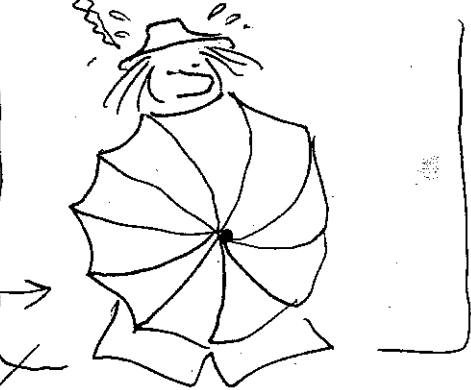

Oh, by Aquarius!

MEUH!

Stay where you are will you!

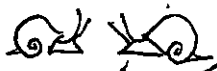

By the Universe. It is just a cow. I shouldn't be so nervous

?

Somebody is coming!

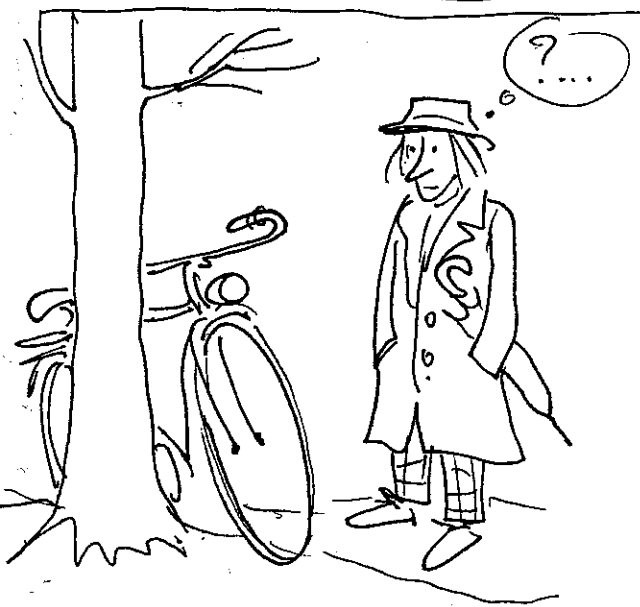

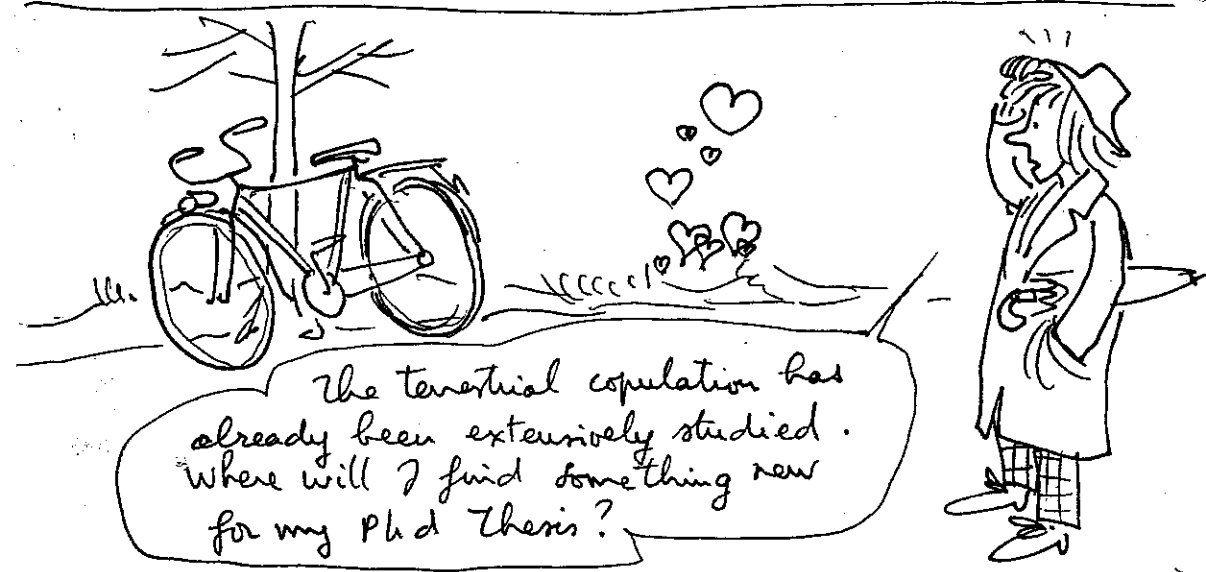

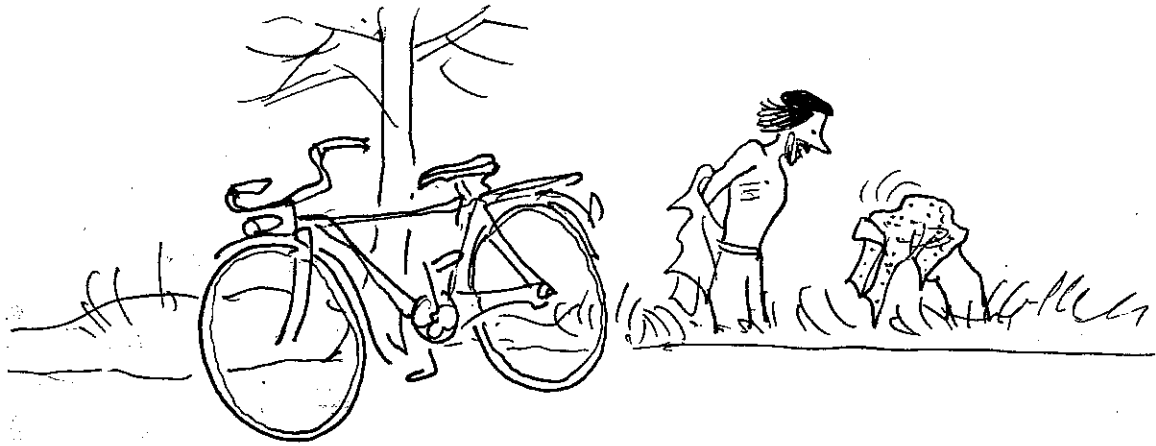

get out of my way!

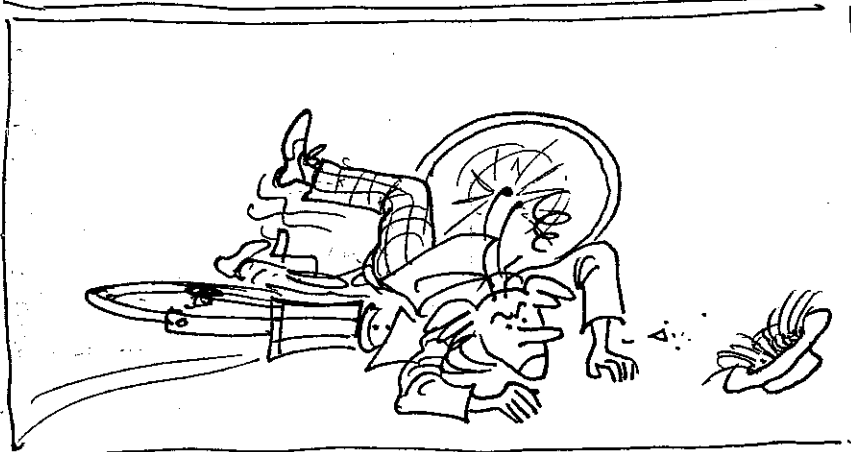

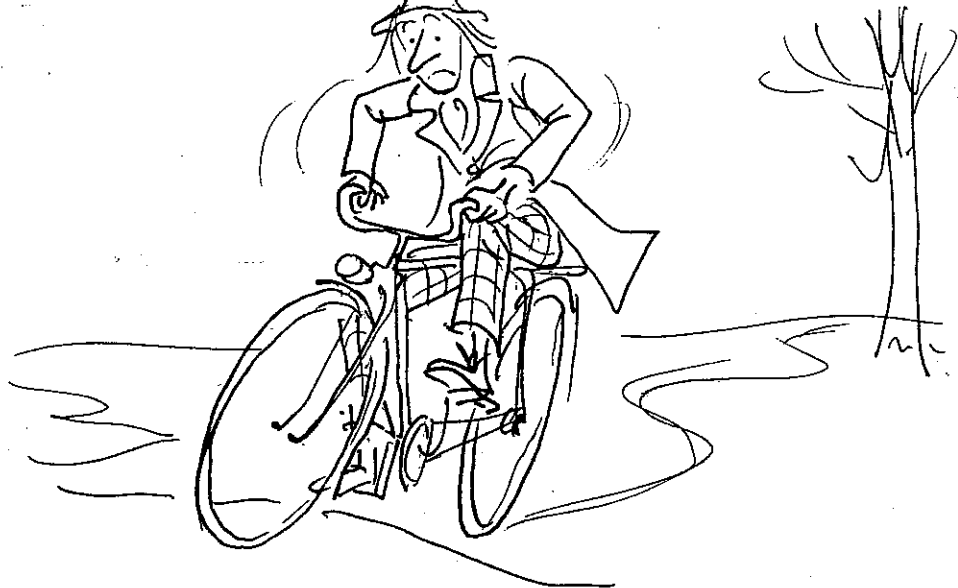

natives

scribbled lines at the bottom of the page.

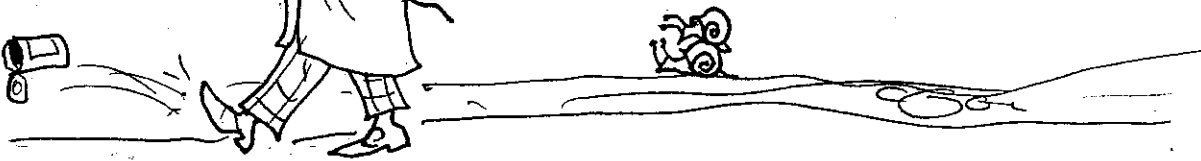

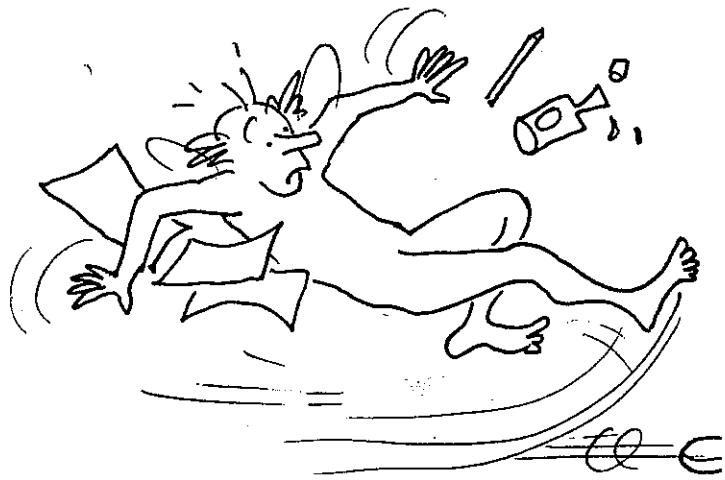

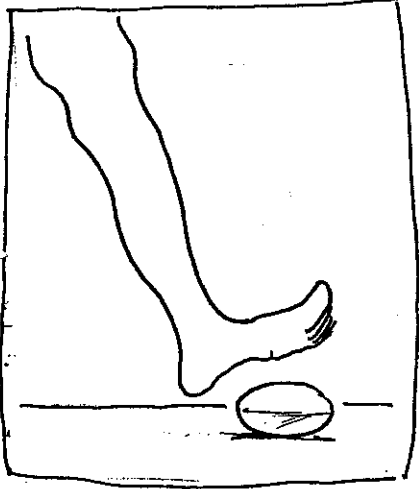

$\vec{\nabla} \times \vec{B} = \mu_0 \left( \vec{J} + \epsilon_0 \frac{\partial \vec{E}}{\partial t} + \vec{\nabla} \times \vec{M}_p \right) ?!!$

oh come on, darling  
don't play that game  
with me

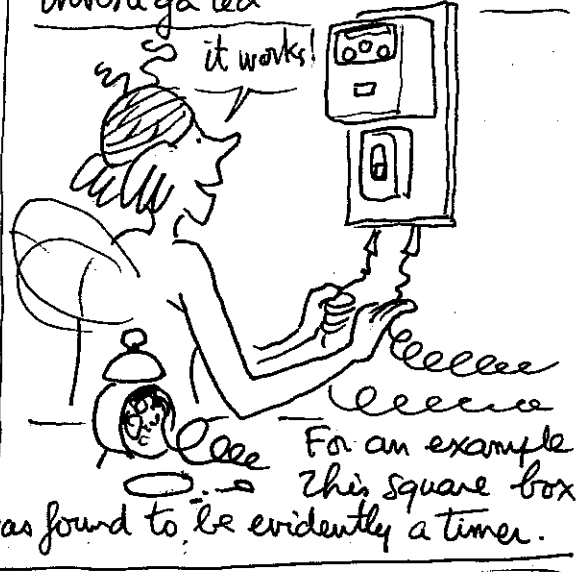

I have discovered what it is  
It is a trap!

1  
Little after little the  
meaning of the objects was  
investigated

For an example  
this square box  
was found to be evidently a timer.

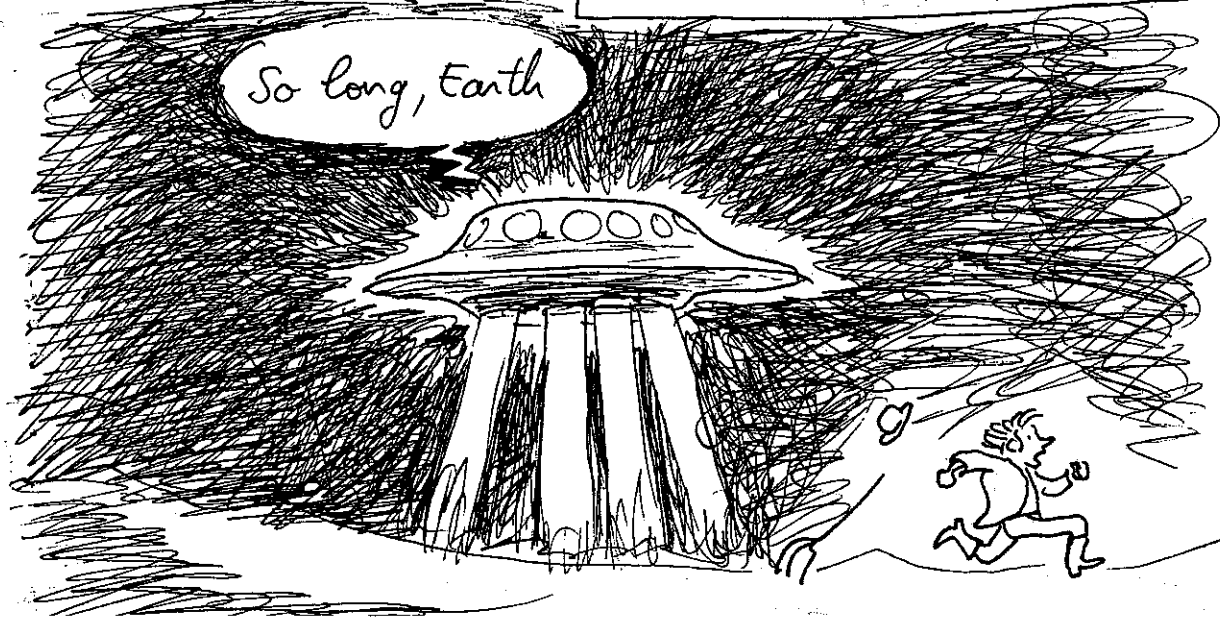

While it appeared that no  
radiowaves were emitted by  
the round one

Someday

So long, Earth

And this picture clearly demonstrates how the humans breath air through little cylindrical filters, using special properties of some peculiar grass

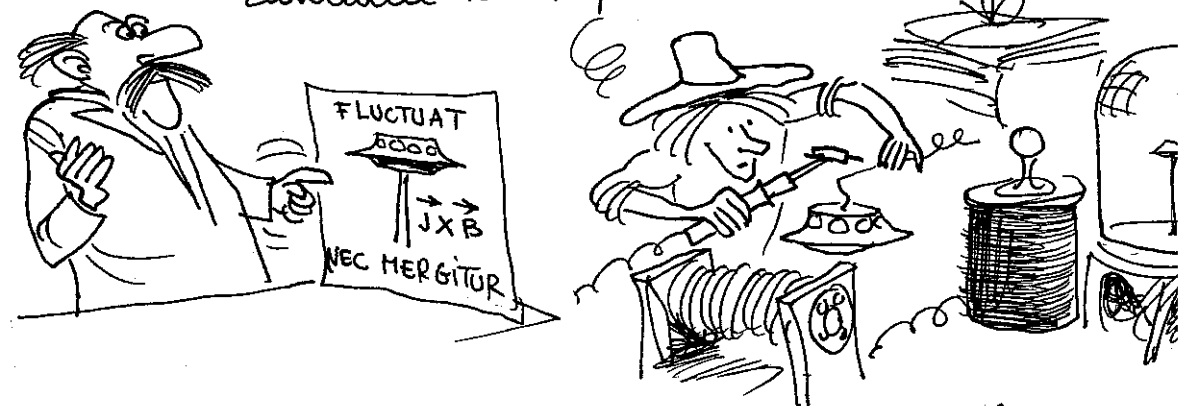

I wonder why the Cosmic University still spend money to study such uninteresting planets  
Don't you ?

Jean Pierre PETIT

THE-END

Monsieur Grenouillard, auteur d'un mémoire sur l'énergie  
démariée, prétend que la théorie d'Anselme  
Lantulu n'est qu'un tissu de sottises

lequel continue ses recherches en Hémathédé.

Officiellement tout le monde est désintéressé, bien sûr
